

Automotive - Portable Refrigerators

TB2001

The Travel Box portable compressor refrigerators can be used in many different applications: from leisure time to boating, from industrial vehicles to coaches for transporting small foodstuffs on journeys.

Design, solidity and very low consumption make this portable fridge, with a capacity of 26 litres, the essential travel mate for all journeys. Designed to be installed in an industrial vehicle, it is powered by 12/24V and its versatility allows it to be used at week-ends, even in cars or boats.

TB2001 is one of the most purchased portable refrigerator for trucks in the last years. Its lid has a double internal recess to hold 2x2 litres bottles. The internal light and cold build-up system are supplied as standard. The control panel features a manual thermostat and an on-off switch. Also available on request in the version with electronic thermostat for electro-medical use.
